

# The 6 M's of Nonprofit Capacity

There are 6 focus areas that affect each nonprofit organization's ability to carry out its work. It is important for every organization to place great emphasis on these areas in order to increase their overall capacity and become more effective and efficient in the pursuit of their mission accomplishment. These focus areas can be referred to as the 6 "M's" of nonprofit capacity™. Like pieces of a puzzle, no one of these components can be deemed less important than another. They coexist as interrelated parts of the organization's capacity building efforts.
